

## Knickerbocker Roofing & Paving Co., Inc. Wins the 2015 Firestone Building Products Master Contractor Award

### *Local Roofing Firm Receives Distinguished Award for Excellence*

**HARVEY, Ill. (March 10, 2015)** – Knickerbocker Roofing & Paving Co., Inc. has earned the 2015 Master Contractor Award from [Firestone Building Products Company, LLC](#), a leading manufacturer and supplier of a comprehensive product portfolio for commercial building performance solutions. From a network of more than 3,000 Firestone Building Products Red Shield™ Licensed Roofing Contractors, the local Harvey firm is one of 256 to earn the designation for roofing system excellence.

“The annual Master Contractor Program recognizes our best contractor firms dedicated to installing roofing systems that help commercial buildings achieve long-term performance,” said Tim Dunn, president of Firestone Building Products. “We’re proud to have offered this award for the last 28 years to recognize our trusted contractor partners who are some of the best in the industry.”

The Master Contractor Program rewards Firestone Building Products-licensed roofing firms throughout the United States, Canada and Mexico. Master Contractors are judged on the basis of total square footage installed and quality points accumulated for outstanding inspection ratings on installations covered by the Red Shield™ Warranty including: RubberGard™ EPDM, UltraPly™ TPO, asphalt and metal roofing systems.

Master Contractors are also eligible to earn points in the sustainability category. The program offered points for the following Firestone Building Products installations: SkyScape™ Vegetative Roof System, PLATINUM PV™ Program and SunWave™ Daylighting System.

To meet the award requirements, contractors must complete a minimum of four Red Shield warranted jobs in the previous calendar year and have a Preferred Quality Incidence Rating (QIR) that did not exceed three times the average QIR for Red Shield Licensed Roofing Contractors. QIR is determined by the annual number of quality incidents per million square feet of roofing under warranty.
